

How to subscribe the Baker Memorial Church Podcast

You don't need an iPod to listen to podcasts. In fact, all you need is a computer. (Transferring the podcast to your portable mp3 player is optional.)

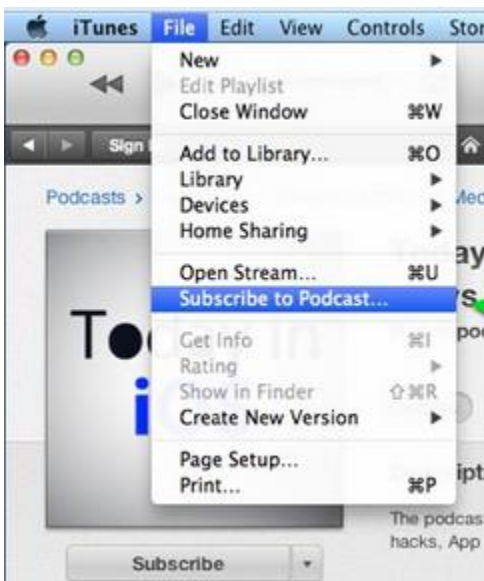

To start, you will need a "podcatching" program like [iTunes](#) or [Juice](#).

Here are detailed instructions for subscribing to podcasts using one of these programs:

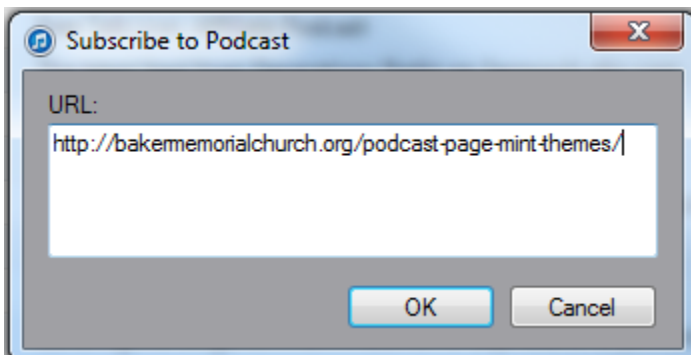

Option #1

Podcasts via iTunes from Apple (Instructions for version 11.0)

1. If you don't already have iTunes, download the latest version at <http://www.apple.com/itunes/download/>
2. Run iTunes and select "Subscribe to Podcast" from the "File" menu,

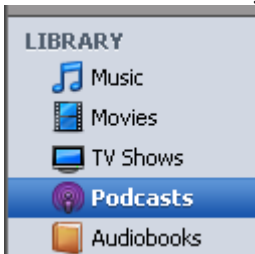

3. Then type or paste the <http://bakememorialchurch.org/podcast-page-mint-themes/> podcast address in the "URL" field

Click "OK", and the downloads begin immediately.

4. New and archived issues will automatically download into iTunes, or you can check for new issues manually by selecting "Podcasts" from the menu on the left

and clicking the "Refresh" button in the lower right corner.

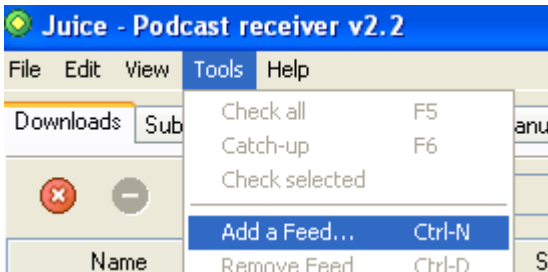

5. To listen, sync your iPod or other mp3 player, or simply double-click on the track in iTunes. You're done! Once you subscribe, new sermons will automatically download whenever you run the software.

Option #2

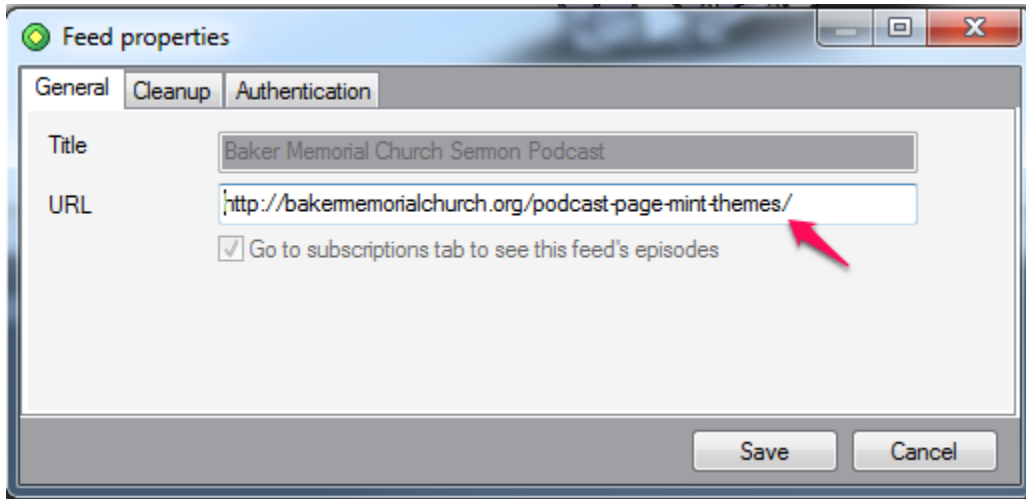

Podcasts via Juice from SourceForge (Instructions for version 2.2)

1. If you don't already have Juice, download the latest version <http://juicereceiver.sourceforge.net/>

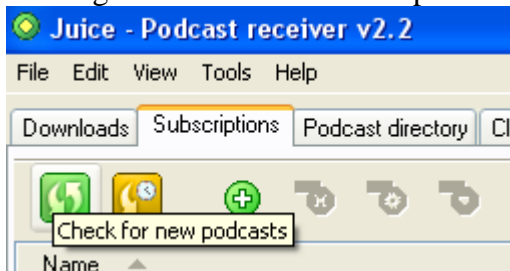

2. Run Juice and select "Add a Feed" from the "Tools" menu,

3. Then type or paste the <http://bakermemorialchurch.org/podcast-page-mint-themes/> podcast address in the "URL" field

4. New and archived issues will automatically download into Juice whenever you open the program, or you can check for updates manually by selecting the "Subscriptions" tab and clicking on the "Check for new podcasts" button.

5. To listen, sync your mp3 player, or simply click on the green "Play" arrow next to the track in Juice.

You're done! Once you subscribe, new issues will automatically download whenever you run the software.
